Belinda Lee (46,863)

I would like to expedite the examination of USPTO Application No.: 10/064613 - Customer No 31561; Docket No 8860-US-PA.

In this case I indicated allowable subject matter. Claims 2, 3, 8, 10, 13. They remain allowable.

If you cancel the other claims I am prepared to allow the application.

The amended claims 1, 4, 6, 9, and 12 will be rejected in view of the previously cited prior art, Morita et al. (US 2002/0135595), figures 11 and 17, paragraphs 196-198, 218-222, wherein Morita teaches of a gray scale conversion/diffusion circuit 21a and error diffusion circuit 22. The conversion/diffusion circuit is a known equivalent of a look up table.

Please respond. Thank You

David L. Lewis  
USPTO Examiner:

Examiner Lewis,

Thank you for considering claims 2, 3, 8, 10, 13 as allowable. The inventor, however, is unable to decide. Please proceed with an Office Action.

Regards,
